# MVP of Google Play Apps Rating Analysis

In this folder, the Minimum Viable Product (MVP) is provided.

The initial steps in detail are provided in the Jupyter notebook. The data explored in addition to the EDA phase is done.

## The MVP notebook summarizes the following:

- Clean the data
- Explore the features
- Drop any unnecessary features
- Handling all missing value

The following figure illustrates the Category vs. App in play store:

## There are a few more steps to finish the project:

- Train and test the model to classify the data more.
- Use different models to classify.
- Try TextBlob in data labelling.
